

Concave Microscope Slides

Product Overview

Premium Concave Microscope Slides feature precision-ground cavities for liquid specimen observation, providing excellent optical clarity and reliable performance in microbiology, cell analysis, and laboratory research applications.

Labelling: Concave Microscope Slides can be supplied with customized packaging labels, product identification, batch information, and barcode marking according to customer requirements. The clear glass surface allows convenient specimen labeling and laboratory identification.

Handling: Handle Concave Microscope Slides carefully to protect the precision cavity surface and optical quality. Avoid impact, scratching, and contamination during operation. Clean the slides according to standard laboratory procedures and store them in a protective container after use.

Key Specifications

- Material
 - Cavity Type
 - Cavity Design
 - Surface
 - Optical Performance
 - Applications

Optical Glass

Single Concavity / Double Concavity

Precision-ground recessed cavity for liquid specimens

High-quality polished optical surface

Excellent transparency and microscopic clarity

Microbiology, Cell Observation, Wet Mount Preparation, Biology Research, Education

Model Selection Matrix

Choose by box quantity, glass grade and edge configuration.

50 PCS / BOX			Thickness: 1.0 - 1.2 mm
CODE	CAVITY DIAMETER	CAVITY DEPTH	
Single Concavity	15-18mm	0.3-0.5mm	
Double Concavity	15-18MM	0.3-0.5mm
