

Positive Charged Microscope Slides

Product Overview

Premium Positive Charged Microscope Slides feature a permanently charged hydrophilic surface that enhances tissue adhesion, providing reliable performance for histology, immunohistochemistry (IHC), molecular pathology and clinical diagnostic laboratories.

Labelling:The frosted writing area provides a permanent labeling surface compatible with pencils, laboratory markers, thermal transfer printers, inkjet printers, and laser printers for accurate specimen identification and efficient laboratory workflow.

Handling:Ground or beveled edge options improve handling comfort and help minimize edge chipping. The positively charged coating provides excellent tissue adhesion while maintaining consistent staining performance during laboratory processing.
